Blinken's Blinkered Mission to Satrapies to Whitewash Israeli Crimes

By: Kayhan Int'l Staff Writer

For the past two-and-a-three quarter years we have constantly heard the name 'Antony Blinken', a dyed-in-the-wool Zionist, serving as Secretary of State to the US regime of Joe Biden, and presently on a tour of pro-American Arab states to try to whitewash the crimes against humanity of Usurper Israel by depicting the liberation movement HAMAS as 'terroristic' and not representing the persecuted Palestinian nation.

Descended from Ukrainian Jews on his father's side and Hungarian Jews on his mother's side (Khazar converts to Judaism, of course, and not the Israelite tribes of the past who share Semitic roots with the Arabs), he first landed in Tel Aviv to felicitate child-killer Benjamin Netanyahu for the genocide in Gaza with tidings of more lethal weapons from the US for massacre of defenceless people.

His tone during talks with senior officials of Arab states – foreign ministers, prime ministers, presidents, princes, and kings – was authoritative like that of an overlord giving orders to appointees to take necessary steps (brutal if required) to control the religious and nationalistic sentiments of the Muslim people they rule from bursting into open anger against Israel and support for the Palestinians.

The person who had advocated the US invasion of Iraq in 2003 while serving as Democratic Staff Director of the Senate Foreign Relations Committee actually conveyed to the world the plain truth which the so-called 'friendly Arab' rulers go to great lengths to hide.

The reality is now crystal clear. These unelected rulers do not represent the people they rule and are nothing more than satraps of a hegemonic power (formerly of Britain and now of the US) given the permission to lavishly enjoy the wealth of the lands under their control, provided they slavishly serve imperialist interests, including subservience to Usurper Israel and its legitimizing of the illegal occupation of Palestine, even if it requires desecration and destruction of the sacred al-Aqsa Mosque and obliteration of the entire Palestinian nation.

This reminds us in the Islamic Republic of what the Iranian people endured for 54 humiliating years under the unrepresentative Pahlavi duo of father and son, who were imposed upon the nation as direct appointees of London, which during World War 2 handed them over to Washington's thrall.

It was the Iranian people's Islamic grassroots movements under the inspiring leadership of Imam Khomeini (RA) which in 1979 cast into the dustbin of history a rootless regime and freed Iran from western hegemony.

No wonder, the US, Britain, and their comrades-in-crimes against humanity have continued to intensely hate the Islamic Republic for the past 45 years through all sorts of plots, such as an abortive invasion, an 8-year unsuccessful imposed war, an unabated spate of terrorism, an unceasing propaganda tirade, and an unsuccessful string of sanctions – all of which have failed to stop the spectacular progress in all fields of Iran and its positive influence on the peoples of the region and beyond, including the unstoppable struggle of the Palestinian people for the liberation of their homeland.

In short, Operation Al-Aqsa Storm is indeed a terrible earthquake, which despite the brutal western-supported massacre of the people of Gaza will soon see the obliteration of the illegal Zionist entity, whether the blinkered Blinken (a non-Semitic Jew) and the duped so-called Christian heads of North America and Europe who have turned a blind eye to the slandering of Jesus and the Virgin Mary by Israel, like it or not.

Envoy: Operation Al-Aqsa Flood Purely Palestinian Decision

Palestinians are seen near an Israeli tank, near the Gaza fence east of the southern Gaza Strip city of Khan Younis, Oct. 7, 2023.

UNITED NATIONS (Dispatches) -- Iran's permanent ambassador to the United Nations has categorically rejected groundless accusations about the Islamic Republic's involvement in retaliatory Palestinian strikes on the occupied territories.

Amir Saeid Iravani, in a letter to United Nations Secretary-General Antonio Guterres, dismissed the allegations, reiterated recently by the Israeli regime's envoy, saying the Palestinian operation was a purely Palestinian decision.

It came days after The Wall Street Journal claimed that Iranian security officials helped plan Palestinian resistance movement Hamas's surprise attack against the Israeli regime and gave the greenlight for the operation.

Top Iranian officials, including Leader of the Islamic Revolution Ayatollah Seyyed Ali Khamenei and President Ebrahim Raisi, have already dismissed the claim while reiterating the Islamic Republic's support for Palestinian resistance.

"The Islamic Republic of Iran categorically and explicitly rejects any unfounded claim about its involvement in Palestine's response to Israeli occupation and aggression," Iravani told Gu-

terres in the letter.

"The recent decisions and measures taken by Palestine's resistance groups are solely determined by the Palestinians themselves and are firmly rooted in the fundamental principle of self-determination," he added.

Stressing that Palestinian people have endured 75 years of relentless aggression, violence, racial discrimination and apartheid policies imposed by the Zionist regime, Iravani said the occupation of their lands continues with the siege of their cities, the destruction and confiscation of their property and agricultural lands, and the forced displacement of residents from their homes by the Israeli regime.

Denouncing Israel's ongoing crimes against Palestinians as a clear violation of the norms of international law, Iran's UN envoy said, "It is regrettable that the international community's response to these severe violations has fallen short in holding those responsible accountable."

Iravani said, "The absence of accountability and the deafening silence of the United Nations Security Council have reduced long-standing UN resolutions to

mere words."

The ambassador further warned against the continuation of Israeli crimes against Palestinians in Gaza and called on the international community to step forward and stop the violence.

"Now, the world is witnessing yet another horrific uptick in atrocities and collective punishment against the Palestinian people in the Gaza Strip that qualify as crimes against humanity and war crimes, orchestrated by the Israeli regime," he said.

"Failure of the international community to intervene promptly could lead to a full-fledged humanitarian crisis with far-reaching consequences," he added.

"The Islamic Republic of Iran urges the international community, United Nations member states, and, in particular, the Security Council to shoulder their responsibilities and take decisive action, compelling the Israeli regime to put an end to its occupation, atrocities, and aggressive actions, and to steadfastly comply with its international obligations, including those under international humanitarian law and human rights law," Iravani added.

Official: Iran First in Ophthalmology in West Asia

TEHRAN -- Iran ranks first in the field of ophthalmology among West Asian countries and competes with the world's most advanced countries in this regard, according to an Iranian health official.

Chairman of the Ophthalmology Department at Iran's Health Ministry Dr. Mahmoud Jabbarvand said Iran has been welcoming millions of medical tourists on a yearly basis and that no Iranian patient is sent abroad for medical treatment.

"Given the scope of research and studies in the field of ophthalmology, Iran is comparable to the world's advanced countries," Jabbarvand said in an interview with IRNA published on Saturday to mark World Sight Day.

"Because of the extensive range and outstanding quality of ophthalmic services and treatment here in Iran, no patient is sent abroad and even many patients from different countries, especially neighboring ones, travel to the country for treatment," he said.

He further said that Iran has gained the expertise to domestical-

ly manufacture artificial corneas, adding that artificial cornea transplant is performed on patients who neither can receive human tissue nor stem cells.

Those who have undergone the surgery have managed to regain their full eyesight, Jabbarvand said.

He explained that 2,500 ophthalmologists are currently active in Iran, which has achieved significant progress in the field of stem cell application.

Tehran Condemns Zionist Attack on Journalists

TEHRAN -- Iran has condemned an attack by the Zionist regime against a vehicle carrying journalists in southern Lebanon that led to the death of one of them.

The Israeli artillery attack targeted the vehicle in the Lebanese village of Alma al-Shaab.

Iran's Foreign Ministry spokesman Nasser con-

doled with and expressed sympathy with the survivors as well as the international community of journalists.

Qatar's Al Jazeera television network identified the fatality as a reporter with Lebanon's official National News Agency (NNA).

Five others were also injured in the attack, including an Al

Jazeera photographer.

Last year, an Israeli sniper gunned down Shireen Abu Akleh, targeting the veteran Al Jazeera journalist with a live armor-piercing bullet.

This is not the first time that the Zionist regime has targeted the Lebanese territory since Saturday when it launched its ongoing hugely deadly war

Ghalibaf: Collapse of Zionist Regime a Reality

TEHRAN -- Iranian Parliament speaker Muhammad Bagher Ghalibaf has called Israel a "big lie," emphasizing that the collapse of the occupying regime is a reality that will materialize in the near future.

Addressing a ceremony here, Ghalibaf said the collapse of the child-killing regime has just begun.

Jewish immigrants to Israel now well know they are no longer safe there, he said, adding that the reverse migration of two million Israeli settlers from the occupied territories is underway.

"Over the past week, the young Palestinians have proven that Israel is nothing but a big lie," he said.

Ghalibaf dismissed false impressions about Israel's military capabilities, describing the regime's armed forces as a "cartoon army".

The mass escape of Israeli troops and their refusal to fight against Palestinian warriors brought disgrace to the regime, Ghalibaf said.

"The Palestinian youths carried out a surprise operation, broke through the Zionist regime's defense lines and captured its troopers. The shame was much graver when the Zionists carried a sophisticated aircraft away from an air base onboard a trailer. The Zionist regime exhibited that it is simply a fake army," the lawmaker said.

Ghalibaf also said that five administrations have come to office in Occupied Palestine in almost two years, which exposes the political instability and disputes within the entity.

Palestinians exposed the fake nature of Israel's security through their widespread retaliatory operations, he added.

against the Gaza Strip.

On Tuesday, the Lebanese Hezbollah resistance movement said it had struck two Israeli military posts in the northern part of the occupied territories in response to the regime's earlier aggression against South Lebanon, which had left three of the group's fighters dead.
